FIG. 4

FIG. 5

The graph shows the relationship between the electromotive force  $V_3$  and the parameter  $\lambda$ . The vertical axis is labeled  $V_3$  and has tick marks at 0 and 1. The horizontal axis is labeled  $\lambda$  and has a tick mark at 1. The curve begins at a high value of  $V_3$  for small  $\lambda$ , decreases slowly, then exhibits a sharp drop at  $\lambda = 1$ , and finally approaches a low, constant value as  $\lambda$  increases further.
